

Packets 11-16

Webpage Students for packets 11-16 you are going to do a project in 2 parts. 1st I want you to use the below table to review 6 websites focusing on the topics in the table. 2nd You will be preparing a personal website to put all of your portfolio information on.

Part 1

Use the table below to review 6 websites of your choosing (school appropriate). Please comment on your thoughts about each topic.

Color – does it look good, can you see all content, or does it hurt your eyes etc....

Navigation – is it easy to navigate or confusing?

Links – Do all the links work & take you to what it says it's going to.

Layout – think back to chapter 2 about the template. Is the site easy to follow and make since. Does it have a heading and footer section that is consistent through the website?

Images – Do the images and the placement of them correspond to the content of the website?

	Website Address	Color	Navigation	Links (Do they work)	Layout	Images (work & placement)

Part 2

Draw out on paper or computer a layout with the different pages that you would need to be able to house your personal portfolio. Remember the portfolio information can be found at tisrowan.weebly.com. Be sure to use your research to assist in the design of your personal website. Please include color choices, text, where you would place images, image captions/description, etc.....

You should have the following pages:

- Template for whole site
- Introduction Page
- Resume Page
- Examples of work
- References
- Credentials / Certifications

Once you have drawn out the layouts with detail. Please take a picture of them and submit them. You may use LiveGrades or Office 365, my email is rcrowan@k12.wv.us. (If you have the resources and want to create the website after you have done the drawings you may, and submit a link to the site for me to review.)
